

ABHIGYAN DUTTA

PROFILE

Computer Science Engineering undergraduate with experience building AI-enabled full-stack applications using React, Node.js, REST APIs, Redis, and modern web technologies. Experienced in integrating LLM APIs into applications, prompt engineering, and developing AI-assisted features. Strong understanding of Generative AI concepts, LLM workflows, and modern software engineering, with an interest in building scalable AI-enabled systems.

EDUCATION

■ Chandigarh University	2023 - 2027
BE.COMPUTER SCIENCE ENGINEERING	
■ JK Public School , Kunjwani , Jammu	2022 - 2023
SENIOR SECONDARY(CBSE)	
■ JK Public School , Kunjwani , Jammu	2021 - 2022
SECONDARY(CBSE)	

ACHIEVEMENTS AND CERTIFICATIONS

- Frontend Development Intern – Ezee Solutions
- Zidio UI/UX Design training Certificate (Remote Internship)
- DevTown certification
- Forage TCS Virtual Lab Certification
- Riverathon(national hackathon) finalist | IIT Bombay TechFest Finalist
- Student Coordinator for college events, collaborating with cross-functional teams

SKILLS

Programming: C++
Web Development: React.js, HTML, CSS, Tailwind, JavaScript, Bootstrap, Node.js, Express.js
Database & Cloud: AWS(basics), Supabase, NeonDB, Redis
AI & GenAI: OpenRouter API Integration, Prompt Engineering, LLM API Integration, Hugging Face, Generative AI Fundamentals
Tools & Workflow: Git, Figma, AntiGravity(IDE)
Soft Skills: Ownership, Team Collaboration, Communication, Problem Solving, Adaptability

PROJECTS

All projects built with an end-to-end ownership mindset: design → code → testing → iteration.

● Furzo  github.com/abhigyan-21/straycare  https://furzo.vercel.app/	03/2025 - 06/ 2026
• Architected and developed a full-stack platform for animal rescue, treatment tracking, and adoption management. • Built AI-powered chatbot assistance using OpenRouter-based LLM integrations to provide contextual support and guidance. • Designed responsive dashboards for case management, reporting, and workflow automation. • Developed and integrated REST APIs for real-time data exchange and application scalability. • Managed the complete product lifecycle, including system design, frontend development, backend integration, testing, deployment, and maintenance.	
● SimpliF1  github.com/abhigyan-21/SimpliF1	04/2026 - 04/ 2026
• Developed a real-time analytics platform using React and external racing APIs. • Processed and visualized live telemetry and performance data for driver comparisons. • Implemented Redis caching to optimize API response times and reduce redundant requests. • Designed data-driven dashboards for performance analysis and race insights. • Integrated external APIs and automated data updates for real-time reporting.	
● SagePath - learning platform  github.com/abhigyan-21/Sagepath	08/2025 - 12/ 2025
• Developed modular and reusable UI components using React • Designed interactive “gym-style” course interface for user engagement and progress tracking • Implemented dynamic state management for badges and personalized learning paths • Ensured responsive design for accessibility across devices • Integrated backend services (Supabase) for real-time data synchronization	
● Cu Connect  github.com/abhigyan-21/Cu-Connect	11/2025 - 11/ 2025
• Developed a real-time video communication platform using React and WebSockets. • Implemented low-latency communication features for seamless user interaction. • Built responsive interfaces optimized for cross-device compatibility. • Designed and integrated real-time event handling mechanisms.
